Fight Cancer Charles G. Spender
This booklet describes an experimental treatment that serves to enhance antitumor immune response and to improve quality of life: "adapted cold shower." The improvement includes better mood and a reduction of fatigue, nausea, and pain. You can use it in addition to (not instead of) your conventional treatment plan. The moderate repeated cooling can allow you to undertake more rounds of chemo-, radiotherapy, or surgical treatment because cooling reduces many side effects of those methods. This approach should improve the chances of survival. The treatment is free and safe, so it would be reasonable to try it, especially if all other options are exhausted. Talk to your doctor to see if this regimen is right for you.

In addition, the current state of science and technology allows us to safely consume raw meat, i.e., to kill virtually all bacteria and parasites while keeping the meat raw or almost raw. The last chapter describes several benefits of safe raw meat for cancer patients.
