Differential Forms in Algebraic Topology (Graduate Texts in Mathematics)

Raoul Bott, Loring W. Tu

Differential Forms in Algebraic Topology (Graduate Texts in Mathematics) Raoul Bott, Loring W. Tu Developed from a first-year graduate course in algebraic topology, this text is an informal introduction to some of the main ideas of contemporary homotopy and cohomology theory. The materials are structured around four core areas: de Rham theory, the Cech-de Rham complex, spectral sequences, and characteristic classes. By using the de Rham theory of differential forms as a prototype of cohomology, the machineries of algebraic topology are made easier to assimilate. With its stress on concreteness, motivation, and readability, this book is equally suitable for self-study and as a one-semester course in topology.

From reader reviews:

Glenda Rizzo:

Reading a publication can be one of a lot of exercise that everyone in the world enjoys. Do you like reading book thus. There are a lot of reasons why people fantastic. First reading a reserve will give you a lot of new info. When you read a publication you will get new information simply because book is one of a number of ways to share the information or perhaps their idea. Second, reading through a book will make a person more imaginative. When you reading through a book especially fiction book the author will bring you to imagine the story how the people do it anything. Third, it is possible to share your knowledge to other people. When you read this Differential Forms in Algebraic Topology (Graduate Texts in Mathematics), it is possible to tells your family, friends in addition to soon about yours publication. Your knowledge can inspire the others, make them reading a publication.

Amanda Despain:

Reading a book tends to be new life style in this era globalization. With studying you can get a lot of information that can give you benefit in your life. Having book everyone in this world could share their idea. Textbooks can also inspire a lot of people. A lot of author can inspire their own reader with their story or perhaps their experience. Not only the storyplot that share in the publications. But also they write about advantage about something that you need instance. How to get the good score toefl, or how to teach your children, there are many kinds of book that you can get now. The authors in this world always try to improve their expertise in writing, they also doing some research before they write on their book. One of them is this Differential Forms in Algebraic Topology (Graduate Texts in Mathematics).

Deborah Knight:

Your reading 6th sense will not betray you actually, why because this Differential Forms in Algebraic Topology (Graduate Texts in Mathematics) reserve written by well-known writer we are excited for well how to make book that can be understand by anyone who also read the book. Written in good manner for you, still dripping wet every ideas and composing skill only for eliminate your current hunger then you still uncertainty Differential Forms in Algebraic Topology (Graduate Texts in Mathematics) as good book not simply by the cover but also by the content. This is one book that can break don't evaluate book by its deal with, so do you still needing one more sixth sense to pick this kind of!? Oh come on your examining sixth sense already alerted you so why you have to listening to a different sixth sense.

Kent Walker:

Is it anyone who having spare time after that spend it whole day through watching television programs or just lying on the bed? Do you need something totally new? This Differential Forms in Algebraic Topology (Graduate Texts in Mathematics) can be the response, oh how comes? The new book you know. You are therefore out of date, spending your free time by reading in this brand new era is common not a nerd activity.

So what these guides have than the others?
