Nursing Research: Generating and Assessing Evidence for Nursing Practice, 10th Edition has been updated to incorporate new methodological advances and, to the extent possible, substantive examples used to illustrate concepts will be from articles published in 2013 to 2015. The organizational structure introduced in the 9th edition will be maintained — i.e., content focusing on quantitative research will be in Part III, and content on qualitative research will be in Part IV.

The textbook package will include the book itself, a Resource Manual, and a digital Toolkit with high-quality forms and tools (in Microsoft Word) that new researchers can modify or use directly (e.g., informed consent forms, demographic questionnaires. Additional useful material will be added to the Toolkit, including links to open-access papers on the topic covered in each chapter.

A valuable ancillary package is available for instructors and students via thePoint. They include PowerPoint slides with relevant tables and figures, test bank, journal articles, case studies, critical thinking exercises, strategies for effective teaching, internet resources, and glossary.
