Developing National Power in Space: A Theoretical Model

Brent Ziarnick

Developing National Power in Space: A Theoretical Model Brent Ziarnick
Exploring the nature of space programs and how nations can maximize advantages gained from space operations, this book draws from military and economic theory to describe an original model of the development and employment of a nation's ability to operate in space. Chapters discuss the implications for the history and organization of America's space program, particularly its military dimension. The rise of American naval power early in the 20th century is investigated as an historical analog to the current American situation in space, and a method is proposed for the U.S. to lead a new space age. This book's unique theory and analysis will be of interest to policy makers, planners, leaders and enthusiasts interested in America's future in space.
