Public Management in Israel: Development, Structure, Functions and Reforms (Routledge Studies in Middle Eastern Politics) Itzhak Galnoor

As government management in Israel is gradually replaced by private sector management, it is becoming apparent that the collective-oriented mission of government cannot be fulfilled by the private sector or by the non-profit organizations of civil society. This book provides an analysis of the machinery of government in Israel, highlighting the inadequacy of the private sector as an alternative and how public management will need to cope with the new challenges and pressures of the 21st century.

Providing hitherto unpublished data and analysis in English for the first time, this book gives a comprehensive analysis of the issue of public and private-sector management. The author examines the tasks of the civil service; the legal foundation of the public management machinery; and the profile of civil servants, and looks at the unwieldy budget process; the prevalence (and absence) of regulation; and external and internal mechanisms of oversight. This analysis is balanced by a detailed exposition of Israel's political-administrative culture with its excessive centralization, secrecy, turf protection, and legacy of improvisation, and their effect on policymaking and administration.

This comprehensive and detailed examination of public management in Israel will be of great interest both to students and scholars of business and management, government and politics, and to policymakers in the region.
