OEE for Operators: Overall Equipment Effectiveness (The Shopfloor Series) Productivity Press Development Team
Overall Equipment Effectiveness (OEE) is a crucial measure in TPM that reports on how well equipment is running. It factors three elements ---the time the machine is actually running, the quantity of products the machine is turning out, and the quantity of good output – into a single combined score. Directly addressing those who are best positioned to track and improve the effectiveness of equipment, **OEE for Operators**defines basic concepts and then provides a systematic explanation of how OEE should be applied to maximize a piece of equipment’s productivity and recognize when its efficiency is being compromised.
